

"I believe the **HARVESTER PROGRAM** has a really positive impact on the community, as men we traditionally have the responsibility to provide and give nourishment and pass on these teachings to the youth, such as hunting and fishing, and the future of the program is really important to our traditional ways as it is the youth who will carry on these teachings and will be providing for us and future generations..."

FOOD MATTERS
MANITOBA

We strive towards education, experience, mentorship and positive relationships to create a solid foundation that supports the leaders and change-makers of tomorrow.

By investing in people, together, we can create capacity, support the development of leaders, the success of projects, and propel the momentum of the food security movement.

FOOD MATTERS
MANITOBA

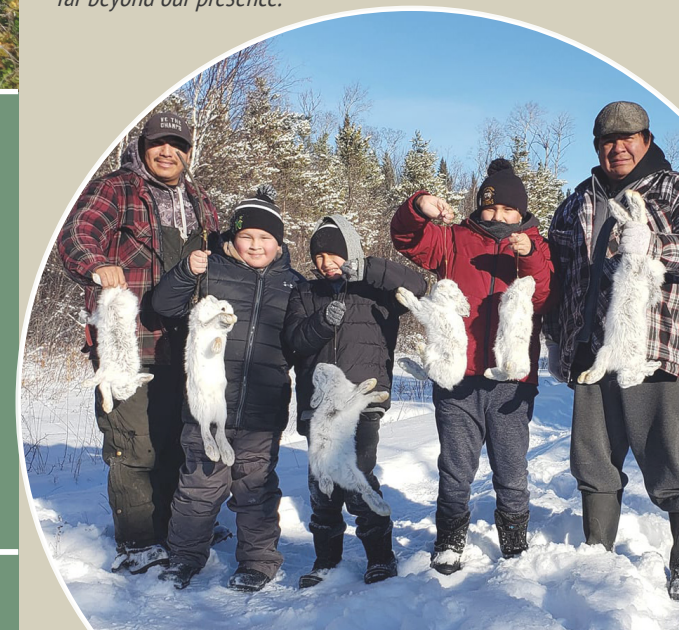

For your partnership, passion, and generous support,

THANK YOU!

BECAUSE OF YOU, WE CAN BRING ABOUT A MORE
FOOD SECURE PROVINCE.

Providing the ingredients for success, empowers younger generations to continue the work far beyond our presence.

SUSTAINABLE FOOD SYSTEM, rooted in food justice.

Our partnerships with communities
are built upon

**RESPECT,
COMMUNICATION,
AND COMMITMENT.**

It often takes many perspectives to see a
picture clearly, as it takes a wide range of skills
and experiences to tackle complex situations.

This is how we approach our work,
**together with those who are impacted,
and those who fight for change.**

This is how we maintain an understanding of
the problems we set forth to fix and the action
required for meaningful impacts.

**We build networks of support within
communities, which expand and intertwine
throughout regions.**

**We connect harvesters, elders and youth,
students and teachers, eager minds together.**

**So that sparks may ignite, illuminate, inspire and
guide a journey to food security.**

Education

Agricultural support

"It interested me to be able to
grow food from scratch."

It's been 3 years now I've been
with Food Matters, and the word
is really getting around, and more
people are wanting to come out."

Harvester program

"I really enjoy and love being out
in the bush with my family...The
part that made me feel good about
doing this was learning from it
and also helping out and actually
providing meat for the elders and
the people in my community."
